## Product Description

This 700 Fill Power Goose Down Winter Comforter represents the pinnacle of luxury bedding engineering. Crafted with premium 90% goose down clusters and wrapped in a 400-thread-count pure cotton shell, this comforter delivers exceptional warmth without excessive weight. The baffle box construction ensures the down filling remains evenly distributed across all chambers, eliminating cold spots and maintaining consistent loft throughout the comforter's lifespan. Each comforter undergoes rigorous quality inspection to verify fill power rating and stitching integrity before leaving our manufacturing facility.

### Key Features

- **700 Fill Power Goose Down:** Premium goose down clusters provide superior insulation with minimal weight, creating a lofty and cloud-like sleep surface that traps body heat efficiently while remaining breathable enough to prevent overheating.
- **Baffle Box Construction:** Internal fabric walls between the top and bottom shell layers create individual chambers that prevent down migration and shifting, ensuring uniform warmth distribution and eliminating uncomfortable cold spots across the entire comforter surface.
- **400TC Cotton Shell:** The tightly woven 400-thread-count cotton shell fabric provides a naturally soft and smooth touch while effectively containing the finest down clusters, offering excellent down-proof performance without chemical coatings or synthetic liners.
- **Double-Needle Stitched Edges:** Reinforced double-needle stitching along all four edges and internal baffle seams delivers exceptional durability for years of reliable use, resisting seam failure even under heavy nightly use in residential and hotel environments.
- **Corner Loop Tabs:** Strategically placed corner and side loop tabs allow secure attachment to duvet cover ties, preventing the comforter from shifting or bunching inside the cover during sleep for a consistently smooth and comfortable bed presentation.

### Technical Specifications

| Parameter | Specification |
|---|---|
| Fill Material | 90% Goose Down / 10% Goose Feather |
| Fill Power Rating | 700 Fill Power (FP) |

| Fill Weight (Queen) | 42 oz / 52 oz / 60 oz |
| Color Options | White, Ivory |
| Season Rating | Winter / Heavyweight |

### Applications

This heavyweight goose down comforter is specifically designed for cold-climate regions and winter-season use in residential master bedrooms, luxury hotel suites, ski resort lodges, and high-end vacation rental properties. The 700 fill power rating provides an optimal warmth-to-weight ratio that creates a cozy yet lightweight sleep environment even when outdoor temperatures drop below freezing. The comforter works exceptionally well as a standalone bedding piece or paired with a duvet cover for extended product life and easier laundering. Its classic white and ivory color palette seamlessly complements any bedroom decor style from traditional to contemporary minimalist aesthetics, making it a versatile choice for interior designers and hospitality procurement managers seeking both performance and visual appeal in their bedding selections.

### Packaging & Quality Assurance

Each comforter is individually vacuum-compressed and sealed in a clear PVC zipper bag for maximum space efficiency during shipping and storage, with five pieces packed per reinforced master carton. Our manufacturing facility maintains ISO 9001 quality management certification and all materials carry OEKO-TEX Standard 100 certification ensuring freedom from harmful substances. Every comforter passes a multi-point quality inspection covering fill distribution uniformity, stitching tensile strength, fabric down-proof integrity, and finished dimensions before release. We provide comprehensive OEM and ODM services including custom sizing, fill weight adjustment, private labeling, and branded packaging solutions to meet the specific requirements of global retailers, hotel chains, and e-commerce brands.
