## Product Description

The sherpa fleece reversible comforter answers one of the strongest demand signals in cold-season home textiles: warmth that feels luxurious to the touch. One side features a dense brushed microfleece face at 220gsm, while the reverse side is a deep 260gsm sherpa fleece that traps a layer of insulating air close to the body. A 250gsm polyester fill is quilted between the two faces with a box-stitch pattern, keeping the loft stable while adding a soft, evenly padded hand feel. The reversible construction gives retailers two looks in a single SKU, extending shelf appeal and allowing buyers to merchandise the same product in multiple color stories.

### Key Features

- **Two Distinct Surfaces:** A smooth brushed microfleece front and a fluffy sherpa back offer two tactile experiences, letting customers reverse the comforter to match the look and warmth they prefer.
- **Extra Warmth for Winter:** The combination of heavy fleece faces and a 250gsm fill delivers strong thermal retention, making this an ideal winter comforter for cold bedrooms and holiday assortments.
- **Stable Box Stitch Quilting:** Even box stitching secures the fill so it stays in place through washing, preventing shifting, bunching, and cold spots.
- **Ultra Soft Hand Feel:** Brushed and sherpa finishes are carefully selected to feel plush and cozy against the skin, a tactile quality that photographs well and drives positive reviews.
- **Reversible Value:** Two coordinated looks in one product help shoppers get more from a single purchase, while retailers benefit from stronger perceived value and repeat sales.
- **Resilient and Washable:** Antistatic, color-fast fleece faces resist pilling and shed, keeping the comforter looking new after repeated machine washes.

### Technical Specifications

| Parameter        | Specification                    |
|------------------|----------------------------------|
| Front Fabric     | 220gsm Brushed Microfleece       |

| Available Sizes  | Twin, Full, Queen, King          |
| Standard Color   | Grey, Navy, Beige, Customized    |
| Care Instruction | Machine Washable, Tumble Dry Low |

### Applications

This reversible sherpa comforter is engineered for the winter bedding market and performs strongly in regions with cold seasons, including Northern Europe, North America, and Northeast Asia. It fits master bedrooms, guest rooms, cabins, dormitories, and Airbnb-style short-term rentals where warmth and cozy texture are priorities. Retailers often merchandise it alongside matching fleece throws and sheet sets to build a coordinated winter bedding collection. The strong tactile contrast between microfleece and sherpa also translates well into marketplace listings, where product photos emphasizing the fluffy reverse side typically drive higher click-through rates.

### Packaging & Quality Assurance

Each comforter is folded, rolled, and packed in a poly bag with a color insert card before being packed into export-grade corrugated cartons. Vacuum compression is available on request to reduce freight volume for large container orders. Quality control covers fabric weight, color fastness, stitching density, and dimensional tolerance, with a final inspection before shipment. Custom hangtags, woven labels, retail-ready color boxes, and buyer-specific poly bag artwork can be produced for confirmed OEM projects, with pre-shipment approval samples provided for buyer sign-off.
