Product Description

The bamboo viscose cooling comforter targets the fast-growing demand for temperature-regulating bedding in warm climates and air-conditioned interiors. The shell is woven from 100% bamboo viscose at 300 thread count, a fiber prized for its silky hand feel, natural breathability, and ability to wick moisture away from the skin. A 180gsm blend fill keeps the comforter light enough for summer nights while still offering a soft, covering weight that many sleepers prefer to a bare sheet. Box quilting holds the fill evenly in place, and the naturally smooth surface reflects light softly for a clean, modern appearance in product photography.

Key Features

- **Natural Cooling Fibers:** Bamboo viscose shell fibers feel cool to the touch and improve airflow, helping sleepers stay comfortable in warm rooms and hot climates.
- **Moisture Wicking Comfort:** The fiber structure draws perspiration away from the body and dries quickly, reducing the clammy feeling common with synthetic-only summer comforters.
- **Lightweight 180gsm Fill:** A medium-light fill provides just enough coverage for summer without overheating, making it a dependable warm-weather bedding staple.
- **Silky Smooth Hand Feel:** Bamboo viscose drapes softly and feels exceptionally smooth against the skin, appealing to buyers seeking a more premium alternative to ordinary microfiber.
- **Sustainable Appeal:** Bamboo-based viscose gives eco-conscious brands a credible story to tell, supporting sustainable bedding collections and green marketing campaigns.
- **Durable Box Quilting:** Even box quilting locks the fill in place and maintains shape through repeated washing, protecting the product's appearance over its service life.

Technical Specifications

Parameter	Specification
Shell Fabric	100% Bamboo Viscose, 300 Thread Count
Fill Material	Bamboo Viscose and Polyester Blend
Fill Weight	180gsm, Lightweight
Cooling Feature	Moisture Wicking, Quick Dry
Construction	Box Quilted
Available Sizes	Twin, Full, Queen, King
Standard Color	White, Sage, Grey
Care Instruction	Machine Wash Cold, Tumble Dry Low

Applications

This cooling comforter is ideal for markets with warm and humid summers, including Southeast Asia, the Middle East, the southern United States, and Mediterranean Europe. It suits hotels and resorts that need a breathable summer layer, as well as homeowners seeking a lightweight alternative to heavy winter duvets. The product also fits well within sustainable and wellness-oriented bedding ranges, where bamboo viscose provides a compelling environmental narrative. Retailers can pair it with moisture-wicking sheet sets and cooling pillows to build a cohesive hot-sleeper collection that increases basket size.

Packaging & Quality Assurance

Each comforter is folded and packed in a recyclable poly bag with an insert card highlighting the bamboo fiber benefits and care instructions. Units are then packed into export-grade corrugated cartons sized for efficient container loading. Incoming and outgoing inspections verify thread count, fill weight, color consistency, and stitching integrity. Recycled and FSC-certified packaging options are available for green-focused brands, and custom printed sleeves, hangtags, and retail boxes can be arranged for OEM and ODM programs, with samples provided for pre-shipment approval.
